SUMMARY

Computer Science Engineering student at VIT Bhopal aspiring to become a Java Full Stack Developer. Skilled in Java and SQL, with hands-on experience in developing practical software applications. Oracle Java Certified Foundations Associate with strong problem-solving skills and interest in backend and full-stack development.

EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering

Aug 2023 – Present

CGPA: 9.21

WORK EXPERIENCE

Student Intern — Cybercrime & Data Analysis Division

Oct 2024 – March 2025

MADHYA PRADESH POLICE

- Developed simple Python-based FastAPI endpoints to receive and process cybercrime-related data in JSON format.
- Validated incoming JSON data and matched relevant fields with existing records to identify related information.
- Worked with 1,000+ cybercrime records and performed basic data validation, matching, filtering, and processing for reporting.

PROJECTS

HridyaVayu – AI-Based Asthma Risk Prediction System

Feb 2025 – Jul 2025

Python, AI/ML, MySQL

- Developed ML model achieving 92% accuracy on 200+ sensor readings for asthma risk prediction.
- Created full pipeline for data preprocessing, model training, and real-time health monitoring.
- Exposed model predictions through a Flask REST API for integration with a front-end monitoring dashboard.

Zovida – AI Medication Safety Platform (Microsoft Imagine Cup)

Sep 2025 – May 2026

Python, AI/ML, Microsoft Azure

- Built an AI-powered prescription-scanning system that detects cross-prescription drug–drug interactions in real time, powered by Microsoft Azure
- Enabled continuous, doctor-verified patient safety across care transitions using a human-in-the-loop AI framework.

Hospital Management System

Jul 2025 – Aug 2026

Java, Spring Boot, Angular, Hibernate, MySQL

- Developed a hospital management system to manage patient records, appointments, and medicines.
- Created REST APIs using Spring Boot for adding, updating, viewing, and deleting hospital data.
- Built separate interfaces and functionalities for doctors and administrators using Angular.

TECHNICAL SKILLS

Languages: Java, C++, SQL

Backend & APIs: SpringBoot, FastAPI, REST APIs

Databases: MySQL

Tools: Git, GitHub

CERTIFICATION

Java Certified Foundations Associate – Oracle

Advanced Software Engineering & Development Programme - MP Online Limited
