SUMMARY

Computer Science Engineering student with strong hands-on experience in AI-powered applications, cybersecurity tools, and full-stack development. Proven ability to design, implement, and present real-world systems through hackathons and academic projects. Skilled in Python, JavaScript, Flask, OpenCV, and Machine Learning, with a growing interest in research, data science, and cloud technologies.

EDUCATION

VIT Bhopal University B.Tech in Computer Science and Engineering	Aug 2023 – Present CGPA: 9.15
IIT Madras BS in Data Science And Applications	Aug 2023 – Present

WORK EXPERIENCE

Student Intern — Cybercrime & Data Analysis Division <i>MADHYA PRADESH POLICE</i>	Oct 2024 – March 2025
– Analyzed 1,000+ cybercrime records to identify fraud patterns and improve detection accuracy. – Built 3 automated dashboards using Python & Excel, reducing reporting time by 25%. – Supported financial fraud documentation and contributed to data-driven decision workflows.	

PROJECTS

HridyaVayu – AI-Based Asthma Risk Prediction System <i>Python, Flask, Machine Learning</i>	Feb 2025 – Jul 2025
– Developed ML model achieving 92% accuracy on 200+ sensor readings for asthma risk prediction. – Created full pipeline for data preprocessing, model training, and real-time health monitoring.	
JalSanrakshak AI – Smart Rainwater Harvesting Planner (SIH 2025) <i>Python, FastAPI, ML, GIS APIs</i>	Sep 2025 – Nov 2025
– Designed an AI-based system to assess rooftop rainwater harvesting and groundwater recharge potential – Integrated satellite imagery, rainfall, soil, and aquifer datasets via government APIs – Integrated ML models for runoff estimation and cost-benefit analysis	
AI-Powered NBFC Loan Assistant (EY Techathon 6.0) <i>Python, FastAPI, Multi-Agent Systems, MCP</i>	Nov 2025 – Jan 2026
– Built an AI assistant to automate loan eligibility assessment and customer query handling for NBFC workflows – Designed rule-based and ML-driven decision support to improve response time and consistency in loan processing	
Zovida – AI Medication Safety Platform (Microsoft Imagine Cup) <i>Python, AI/ML, Microsoft Azure</i>	Sep 2025 – May 2026
– Created an AI system for cross-prescription medication safety and drug-drug interaction risk detection – Enabled continuous patient safety across care transitions using a human-in-the-loop AI framework	

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript
Backend & APIs: FastAPI, Flask, REST APIs, MCP
AI / ML: Machine Learning, Generative AI, LLMs, Agentic AI
Databases: PostgreSQL, SQLite, MySQL
Tools: Git, GitHub, Docker, Linux, VS Code

CERTIFICATIONS

Java Certified Foundations Associate – Oracle
Introduction to Machine Learning – NPTEL
The Bits and Bytes of Computer Networking – Google
AWS Technical Essentials – Amazon Web Services
